Course Objectives: The course introduces Japanese interior design and garden design philosophy, aesthetic and principles, and explains how we can adapt the essence of its concept to contemporary projects as it is getting more and more popular in the design community nowadays.

Course Description: Japan embodies the fascinating cross-section of a country endowed with a rich and varied culture, firmly imbued with traditional knowledge, skill and experience. The course deals with every aspect of traditional Japanese architecture (interior and exterior), from its general plan and major structural features to such ceremonial and traditional appointments as the tatami mats, lamps, hibachi (braziers), fusuma and shoji screens, candlesticks, and tokonoma (places where art objects or flowers displayed). It covers details of both construction and architectural ornamentation, and it points out the many ways in which the traditional Japanese house achieved the almost ideal blend of art and nature, decoration, and stark simplicity that is its hallmark. It shows in detail such things as how natural irregularities (such as in logs) are used to advantage, how partitions change the shape of the interior, and how the garden with its bridges, lanterns, and natural forms (sometimes artfully wrought) complements the severity of the house itself.

Learning Outcomes: **Upon successful completion of the course, students will**

1. Get knowledge about a traditional yet popular culture's design philosophy
2. Develop new design concepts for their projects
3. Be able to apply new and different ideas in practice
4. Be able to create new approaches in their designs and answer the needs of today's market.

Language: The lecture, discussions, presentations and assignments will be in English. Developing your verbal and reading language skills will be very important in acquiring the disciplinary terminology as well as daily communication at the class.
