

IAED 4305 Occupational Health and Safety in Interior Architecture I

Prerequisite: None

Credit: (2+0) 2

The position of occupational health and safety in business management is transferred as a healthy and safe life. Hazard and risk concepts, legal regulations, risk analysis and methods are taught. It is aimed that the students understand the effects of environmental stress on the working environment, safety and health, accident data, accidents, precautions to be taken and the legal responsibilities of the work safety law to employers and employees.
