Cours	e Objectives:	The project assigned within the context of this course will be designed to guide students in design research, to evaluate the results of this research, to determine a fitting design problem and to prepare alternative solutions to this problem. Special consideration will be given to the design of a small shop. The application of forms, lighting, colors, materials, Mezzanine Floor and construction systems are further elaborated in detail. Model making and sketches are an essential part of presentation and progress of the projects. Manual technical drawing is compulsory.							
Course	Description:	This course provides an introduction to the processes of interior design and the various aspects and considerations involved in practice of residential design. This course deals with basic structural solutions by considering the aesthetical, visual, cultural, structural and functional values of design, as well as interior and environmental factors.

Planned Learning Learning/Teaching Method: This is a studio course and students learn about design process by getting Activities and Teaching directly involved in the process. The studio practice is supported by lectures and group/one-o-one critique Method: sessions. The main teaching medium in studio is individual critiques.

> Project Development: A series of assignments with emphasis on the main topic will be offered in this course. In the first half of the semester assignments will mainly include exercises in relation to the writing User Profile, Site analysis, Concept and Scenario, Zoning and Bobble Diagram and design proposal through shaping plan and doing model. In the second half of the semester these exercises will be followed by developing the actual design project. For developing the projects minimum 80% critiques are expected. Attending the critiques will not be enough for a good design development and providing necessary materials to show the project improvement during the critique sessions is compulsory.

> Design Development Folder: You are required to have a folder and keep all your critiques and submissions in that folder. Your instructors will sign all you bring for critiques. Sheets with no signature will not be considered in evaluation. You are required to submit these folders at the end of the semester.

> Class Participation: Regular attendance of all enrolled classes is expected. Do not be late to the class. Critiques will be considered as studio attendance. At the end of the Semester, your attendance will be reported on UBS system. Attendance is compulsory and in case of absenteeism of more than 20% for the practice and %30 for the theory, the system will automatically grade you "FX". If you miss a class, it is your responsibility to 'make up' all work, including items discussed in class. Class contribution will be measured in terms of quality not quantity.

> Academic integrity & plagiarism: Academic integrity is the pursuit of scholarly activity based on the values of: honesty, trust, fairness, respect and responsibility. Practicing academic integrity means never plagiarizing or cheating, never misrepresenting yourself, never falsifying information, never deceiving or compromising the work of others. Basically this means, either intentionally or unintentionally, using the words or ideas of someone

else without giving credit, it's strictly forbidden.

There will be pop-up quizzes (unscheduled or unannounced quiz) throughout the semester. The aim is recording student's drawing and modelling skills. In case of serious differences between the quiz results and jury submissions, instructors are allowed to take an extra exam from students. Also, all visual submissions will be checked through Google's image search engine and in case of detecting high level of similarities between student project and existing designs, the case will be investigated and handled by universities' discipline committee.

Course Text books: There is no specific textbook for this course. Students are required to study the recommended reading text books and also do researches on the variety of architectural presentation techniques.

Key Works: In this studio course lectures and assignments mainly focuses on User Requirements, critical thinking, elements of design and the awareness of basic concepts, human factors, functions, constructional solutions and materials in designing a space.

Specific Rules:

- 1. Be punctual. Punctuality is a sign of respect toward yourself and the others.
- 2. Show respect for all the people and property around you.
- 3. Be responsible for your actions and meet all expectations.
- 4. Follow directions the first time they are given.
- 5. Students should use the Internet at school for academic purposes only.
- 6. It is forbidden to record classes with any type of device.
- 7. Modelling in design course intends to shape students' 3D perception and therefore any model that is made by Laser cut and 3d printer will be graded as 0.
- 8. **Hard copy jury/submissions:** Students are required to be in the studio at the exact time announced in exam programs with their sheets and models. All the submissions will be checked, listed, and signed by the research assistants. Students are only allowed to present the materials and sheets that are listed as submissions.

Communication: Students are encouraged to visit the professor during their Office Hours. If you cannot make it to announced office hours, please make individual arrangements via e-mail. However, do not expect the professor and the research assistant to respond at length via e-mail to questions of content, definition of terms, grading questions etc. If you have a question that requires a substantive response please set up an appointment to speak with one of us.
