IAED 3002	INTERIOR DESIGN STUDIO VI	2024-2025/ Fall	4	4	6	10

**Level of Course:** Undergraduate

**Course Type:** Core Course

**Language of**

**Instruction:** English

**Course time:** Monday, 9.00 –13.00; Thursday, 9.00 –13.00

**Course classroom:** BB-25

**Mode of Delivery:** One o one critique, Class Teaching, Presentation, Assignments

**Prerequisites and** Prerequisites: IAED 3001 Interior Design Studio V

**Co-requisites:** Co-requisites: IAED 4001 Interior Design Studio VII

**Course Coordinator:** Asst. Prof. Dr. Yaren Şekerci

**Name of Lecturer(s):** Asst. Prof. Dr. Yaren Şekerci

**Course Teaching**

**Assistant:** Res. Asst. Müge Develier

**Course Objectives:** The project assigned within the context of this course is designed to guide students in design research to evaluate the data to determine a solution to given design tasks and to prepare alternative solutions to the design problem. In this context the case will be a designing and office under three main themes. The application of forms, lighting, colors, materials and construction systems are further elaborated in detail. 3D Modelling is an essential part of presentation and progress of the projects.

**Course Description:** This course focuses on functional, technical, and structural proposals for office spaces such as headquarters, doctor clinics, veterinary clinics, or other types of offices. In line with this objective, the course addresses structural solutions by considering the aesthetic, visual, cultural, structural, and functional values of design, as well as interior and environmental factors within the working environment.

**Learning Outcomes:** Upon successful completion of the course, students will be able to:

1. Ability to provide a conceptual approach that identifies the necessary subjects to create an appropriate working atmosphere and the ability to develop solutions that ensure an optimal workflow.
2. Ability to design spaces in accordance with universal design principles, ensuring accessibility and inclusivity for all users.
3. Ability of considering technical and mechanical solutions, such as HVAC, lighting,

- Language:**
- acoustic systems, and fire safety measures, including fire escapes and evacuation routes, in the design process.
4. Ability to express the design effectively through verbal, written, drawing, and presentation formats.
  5. Ability to utilize up-to-date technologies in the design process, enhancing both functionality and innovation.

The studio classes and discussions will be in English. Developing your verbal language skills will be very important in acquiring the disciplinary terminology as well as daily communication at the class.

**Planned Learning Activities and Teaching Method:** **Learning/Teaching Method:** This is a studio course, and students learn about design process by getting directly involved in the process. The studio practice is supported by lectures and group/one-o-one online critique sessions. The main teaching medium in LMS and Mic. Teams realizes in online individual critiques.

**Project Development:** A series of assignments with emphasis on the main topic will be offered in this course. In the first half of the semester assignments will mainly include exercises in relation to the writing User Profile, Building analysis, Concept and Scenario, space organization and first design proposal. In the second half of the semester these exercises will be followed by developing the actual design project. For developing the

projects **minimum 80% critiques are expected.**

**Class Participation:** Regular attendance of all enrolled classes is expected. Do not be late to the class. At the end of the Semester, your attendance will be reported on UBS system. Attendance is compulsory and in case of absenteeism of **more than 20% for the practice and %30 for the theory, the system will automatically grade you “FX”**. If you miss an online class, it is your responsibility to ‘make up’ all work, including items discussed in class. Class contribution will be measured in terms of quality not quantity.

**Academic integrity & plagiarism:** Academic integrity is the pursuit of scholarly activity based on the values of: honesty, trust, fairness, respect and responsibility. Practicing academic integrity means never plagiarizing or cheating, never misrepresenting yourself, never falsifying information, never deceiving or compromising the work of others. Basically this means, either intentionally or unintentionally, using the works or ideas of someone else without giving credit, it's strictly forbidden.

**Course Text books:** Students are required to study recommended reading text books and also do researches on the variety of architectural presentation techniques.

**Key Works:** In this studio course lectures and assignments mainly focuses on Employee wellbeing, Brand Identity, Ergonomics in Office Environment, Dynamic Working Environment.

**Specific Rules:**

1. **Be punctual. Punctuality is a sign of respect toward yourself and the others.**
2. Show respect for all the people and property around you.
3. Be responsible for your actions and meet all expectations.
4. Follow directions the first time they are given.
5. It is forbidden to record classes with any type of device.
6. In case of presenting a design development that is not followed by instructors during the course critiques, students will be asked to join a sketch exam at the end of the semester.

**Communication:** Students are encouraged to contact their professor via e-mail. However, do not expect the professor and the research assistant to respond at length via e-mail to questions of content, definition of terms, grading questions etc. If you have a question that requires a substantive response, please set up an appointment to speak with one of us.

26.12.24		-Poster critique	Finalizing design proposal
30.12.24	15	- Q & A	Finalizing design proposal
2.01.25		- Q & A	Final preparation

\* PLEASE NOTE: Details of the syllabus and course schedule are subject to minor changes that will be announced in class.

**Juries:**

**For Midterm:** The format of the juries will be Soft copy. Students are required to upload their sheets in LMS before the announced deadline and be present in the studio at the exact time announced in the exam programs. All the uploaded sheets will be checked and listed by

research assistants. Students are only allowed to present the materials and sheets that are listed as submissions.

**For Final:** Students are required to be in the studio at the exact time announced in exam programs with their sheets and models. All the submissions will be checked, listed, and signed by the research assistants. Students are only allowed to present the materials and sheets that are listed as submissions.

**Grading:** Midterm and final exam responses will be evaluated by jury members and based on functionality, thoughtfulness and technical solutions. Assignments will be evaluated for content, quality of ideas and clarity of presentation (including all necessary materials). **If total assessment grade is lower than 50, student need to repeat the course.**
